

Risk Control Technology Solutions

Water and fire are the leading causes of loss for construction projects in the United States, driving insurance premiums and deductibles higher and reducing already thin profit margins.

While insurance provides protection for covered losses, ripple effects including project delays, un- or under-insured expenses, and reputational damage can also be significant.

Fortunately, proven IoT technology solutions managed by Insight Risk Technologies provide early detection and response capabilities that can reduce or even eliminate these loss exposures, safeguarding profits and reputation.

Insight Risk Offering

Insight Risk provides enhanced, comprehensive risk control technology consulting to meet specific needs of all stakeholders.

Each Insight Risk IoT technology solution is designed to meet the specific needs of each project, and sourced from Insight Risk's growing list of preapproved vendors.

Our solutions also include custom-designed prevention and response plan, 24/7 monitoring with instantaneous notification of potential loss events via text message, email, and in-app alerts, and periodic status reports including alert details, estimates of averted losses, and other risk control insights that help our clients learn from experience how to manage risks more effectively.

Environmental monitoring (water detection, temperature, rate of rise, and humidity monitoring)

Site security cameras, including infrared and thermal imaging

Remote shut-off valves

Water flow metering

Exceptional Service

Our dedicated team of experienced professionals provides efficient and effective implementation in accordance with project needs, offering these benefits.

Cost Effectiveness: Insight Risk significantly reduces design, procurement, installation and administrative costs for its customers by leveraging its technology expertise and bulk purchasing power.

Time Saving: Insight Risk relieves project managers of the burden of technology selection and implementation by handling every aspect of technology deployment using a dedicated loss control specialist assigned to each client.

Premium White Glove Service: Insight Risk leverages its experience with hundreds of IoT technology deployments to deliver premium value-added services from project inception to close-out.

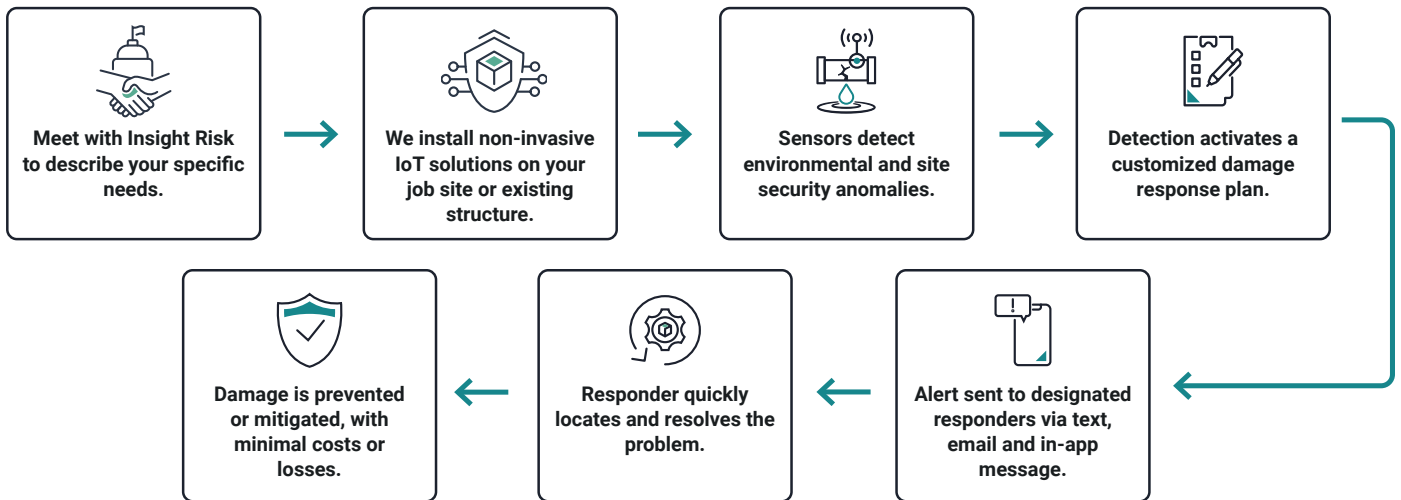

Why Choose Insight Risk

With our team's proven track record with hundreds of deployments backed by 150+ years of construction, technology development, underwriting, and claims experience, Insight Risk is your one-stop loss prevention solution.

Insight Risk removes significant barriers – cost, implementation, and management of technology - to create safer and better-connected buildings and job sites, helping clients avoid losses altogether and minimizing the impact of unforeseen events.

Compared to researching, vetting, communicating with, and managing multiple vendors to create your own custom solution, Insight Risk saves you **120+** hours of work, allowing you to dedicate more time to successfully managing your project.
